DETAILED ACTION

Allowable Subject Matter

Claims 1-22 allowed.

The following is an examiner's statement of reasons for allowance: The following limitations (claim 1) wherein the one rotation guiding projection is engaged in said at least one circumferential groove such that said rotatable ring is rotatable at an axial fixed position without moving along said optical axis when said rotatable ring is moved to said front movement limit by said advancing/retracting mechanism; (claim 15) wherein said rotation-guiding projections engaged in said circumferential groove such that said rotatable ring performs a fixed-position rotating operation in which said rotatable ring rotates at an axial fixed position without moving along said optical axis relative to said outer annular member, when said rotatable ring is positioned relative to said outer annular member in said optical axis direction so that said male helicoids and said female helicoids are disengaged from each other; and (claim 16) at least one rotation-guiding projection located on said outer peripheral surface of said rotatable ring at a position different from a position of said male helicoid in said optical axis direction and slidably engageable in said at least one circumferential groove, wherein said at least one rotation-guiding projection is disengaged from said at least one circumferential groove when said male helicoid and said female helicoid are engaged with each other, and wherein said at least one rotation-guiding projection is engaged in said at least one circumferential groove when said male helicoid and said female helicoid are disengaged
